LONDON, May 10.—The expected general offensive along the Macedonian fronts apparently has been started with full vigor. From Lake Ochrida eastward to the region about Lake Doiran numerous big battles are in progress, with the entente allies the aggressors. Southwest of Lake Doiran the British have captured Bulgarian trenches at one point on a front of two miles to a depth of about five hundred yards, and held and consolidated the ground gained despite heavy counter-attacks. Northwest of Monastir, in the Cerna River region, and on various other sectors, the French and British are carrying out heavy operations, both with artillery and infantry. In the famous Cerna River bend the Russians have captured several trench elements, while in the upper valley west of the Moglenica River the Serbians have struck hard at the invaders of their country and taken from them two points of support and a number of prisoners.

The communication, which is dated Saloniki, Tuesday night, says:

"After artillery preparation lasting several days our troops attacked the enemy's trenches from a point southwest of Lake Doiran on a front of about four miles. On the left we captured the enemy's trenches on a front of two miles and advanced our line to an average depth of five hundred yards and consolidated our new position.

"On the right we captured the enemy's trenches between the Lake and Petit Nouronne on a front of about a mile. The enemy, however, heavily counter-attacked our new position on this part of the front. After determined hand to hand fighting, in which our troops inflicted severe losses, they were forced back by superior numbers to their own trenches." "Bombing raids by airplanes on enemy tenes, sheds, dugouts and transports have caused much damage. One and a half tons of explosives were dropped with good effect."

BRITISH SHIPS TO EXCEED ALL

MORE WORKMEN AND MORE STEEL NEEDED

After War, British Mercantile Fleet As Big As

(By Morning Bulletin Leased Wire) LONDON, May 10 .- During a disission of shipping problems in the House of Lords today, Earl Curson said the admiralty had the first call on the shipbuilding resources. The re-

on the shipbuliding resources. The result of the British maval program, he stated, would be that after the war Great Britain's naval tonnage would exceed the naval tonnage of all the other nations of the world.

In making his statement in the House of Lords, Lord Curzon announced that the program of the minister of shipping provided for the creation each year of mercantile shipping aggregating 3,000,000 tons gross. The government, said Lord Curzon, was taking the most drastic steps in its power to acquire merchant ships by building or purchase, and after the war, he predicted, the British mercantile fleet would be equal to or better than before the war.

Lord Curzon gave figures showing that before the war the United Kingdom had 45.3 per cent. of the mercantile ships under 1,800 tons each, and 45.2 per cent. in December, 1916.

In ships exceeding 1,500 tons each, and 45.2 per cent. in December, 1916.

In ships exceeding 1,500 tons each, ne said, the United Kingdom had in June, 1914, 3,300 vessels of gross tonnage totalling 16,00,000 tons. The corresponding figures in March, 1917, he said, were 3,500 ships, aggregating nearly 16,000,000 tons.

If the shipping minister's program was to be realized, it would be necessary, he said, to provide an additional 100,000 workmen, and to double the weekly supply of steel, while at the same time allowing the present Admiralty program to proceed.

In the House of Commons, where discussion, Sir Leo G, Chiozza Money,

In the House of Commons, where the tonnage question also was under discussion, Sir Leo G. Chiosza Money, representing the shipping controller, informed the House tha 92 per cent. of the total available tonnage had been placed at the disposal of the food controller, the war office, the admiralty and the ministry of munitions, leaving only eight per cent. for other uses in the conveying of commodities.

British Commons Holds Secret Session to Hear Churchill's Criticisms

Official Report Issued Says That General Military Situation Was Dealth With, Special Reference Being Made to Russia, Struggle On West Front, Strength of United States, and the Losses Arising Out of Submarine Attacks.

(By Morning Bulletin Leased Wire)
LONDON, May 10.—Parliamentary circles were greatly interested in today's secret sessions of the house of commons at which many questions uppermost in the public mind were discussed. Colonel Winston Spencer Churchill, formerly First Lord of the Admiralty, the most distinguished member of the Liberal war committee which demanded the secret sestion, is believed to have raisd all the principal subjects under discussion, giving Premier Lloyd George opportunity to reply immediately. The secret session probably will continue over Friday.

The secret session was begun after

Friday.

The secret session was begun after the question had been asked, the galleries being cleared.

There is a simple rule under which the house may be cleared of strangers. A member of the government rises in his place and utters the formula: "I spy strangers," whereupon officials clear the galieries and seal the doors. Strangers also are asked to leave the lobbies and precincts of the house. Members do not take any oath of secrecy, but could be proceeded against under the Defense of the Ralm act should they disclose secrets.

Official Report

The official report of the secret session issued tonight says that Colonel Winston Spencer Churchill opened the discussion and dealt with the general military stituation, with special reference to the position in Russia, the developments of the struggle on the western front, the strength of the United States and the question arising out of the submarine attacks.

"The losses of personnel and material." the statement continues, "were commented on , and the general diplomatic situation in the Balkans discussed. Suggestions were made for meeting the submarine danger and

He cited opinions of the British and French military chiefs in satisfaction as to the results of the recent combined efforts, on the western front. The premier then explained how it was proposed to satisfy the war office demands for further reserves, and also gave figures of the British tonnage sunk month by month since last August and gave an encouraging account of the methods adopted to meet the figures of the new tonnage which could and would be built during the next twelve months.

Deals with Food Question

"Upon the food question the premier pointed out that with judicious economy in consumption and increased productivity in home supplies there need be no alarm as to starvation and that in 1918 we should be self-supporting. BUDGET DEBATE IS CONTINUED

Government Defeats Turriff Motion By Majority

Spend Day on Budget.

Spend Day on Budget.

The House spent the greater part of the day debating the budget. Hon. T. W. Crothers, minister of labor, who resumed the discussion early in the afternoon, confined his remarks to a criticism of the tacties of the opposition and to a defence of the administration of the department of labor. He maintained that much good had been accomplished under the provisions of the order in council dealing with the high cost of living. As a result of the campaign of publicity, he asserted, prices had, to a certain extent, been kept under control.

W. S. Loggle, Liberal member for Northumberland, who followed, fayor-

W. S. Loggle, Liberal member for Northumberland, who followed, favored a coalition government. Such a government, he believed, would be able to implement the promise of the prime minister to furnish 500,000 troops from Canada, even if it were necessary to depart from the voluntary plan of enlistment.

minister to furnish 500,000 troops from Canada, even if it were necessary to depart from the voluntary plan of enlistment.

Retribution to Nationalist.

J. E. Marcil, of Bagot, asserted that the trouble Hon. P. E. Blondin has experienced in Quebec in connection with his recruiting campaign, was what he might have expected in view of his nationalist teachings in 1911.

Dr. Eugene Paquet, of Fislet, who followed, defended Hon. P. E. Blandin. He had given up his important post, he said, to recruit a regiment for overseas service. Did Mr. Marcil want him to go at once and shed his blood on the field of battle.

F. N. McCrea, of Sherbrooke, criticised the minister of finance for fix, ing a price on news print. The cost of production, he said, was growing, and there would be little profit in it at 2½ cents per pound.

W. A. Charlton, of Norfolk, asid the paper and pulp mills of the Dominion were working night and day, while four or five had been proceeded against under the Lord's Day Act for operating on Sunday. This was necessary in order to supply the demand, and indicated the need of more capital being invested in the business.

Criticises Regulations.

Fred Pardee criticised the minister of labor in regard to the cost of living regulations. The whole purpose of the minister's plan, he said, was to shift responsibility on to other shoulders.

At the conclusion of the debate the amendment by J. G. Turriff, calling for parliamentary ratification of the free wheat proposals, was defented by a vote of 51 to 40, or a government majority of 11. The opposition applauded that they had been paired with Conservatives, but that they would have voted for the amendment.

James Robb, of Huntingdon, then moved that bran, shorts and middlings be placed on the free list. As the hour was late, he desired, however, to adjourn the debate. Bir George Foster considered that the debate should conclude tonight.

Sir Wilfrid Laurier stated that several other amendments were still to be moved. Owing to the late hour he thought that the deb chase was continued for one hour and twenty minutes, and the enemy was engaged at long range, but our force was unable to overtake him.

"Four British destroyers chased the eleven German destroyers to within range of the guns of the batteries at Zeebrugge.

"Our casualties were one man slightly wounded. The enemy's destroyers were seen to be hit by our fire."

The sallors of Commodore Tyrwhitt's squadron are disgusted at the refusal The sallors of Commodore Tyrwhitt's squadron are disgusted at the refusal of the Germans to accept battle. They say that many hits on the German de-stroyers were registered. Some of them declare that four of the German destroyers were so badly damaged that they can be of little use for some time.

LAUDS AID FROM DOMINIONS

LONDON, May 10.—Lord Derby, secretary of state for war, speaking at South Kensington today, said that it would be under-estimating the number to say we had eleven allies, because we could no longer look upon the Commonwealth (Australia) and the Dominions as simply dependents of Great British. They were the firmest allies any country could have.

before the end of the week.

Though statements have emanated from Victoria that Hen. M. A. Mac-Donald, attorney-general in the government, would resign this evening of tomorrow morning following the evidence taken at the investigation by Mr. Justice Gregory into the Cowper charges, all inquiries tonight from leading Liberais in this city have falled to elicit any information that would either confirm or deny this.

Plans Are Considered for Making Struggle With Operators More Effective. (By Morning Bulletin Leased Wire) CALGARY, May 10 .- The miner

representatives are again in conference here and today was spent in get ting the preliminary bsuiness of the

ence here and today was spent in getting the preliminary bouiness of the meeting over. Every miners union in the district is represented and the struggle between the operators and mine workers more effective.

From statements of international mine union officials who attended and from the expressions made by other speakers it became evident that one of the principal reasons for the refusal of the men tho accept the proposed agreement was the clause relating to penalties in the case of the breaking of the agreements. Another feature objected to was the regulations regarding "outside" men. The miners, it appears, are not satisfied with an eight-hour day for all "outside" men instead of a nine-hour day for this class of labor.

The failure to enforce the single shift system was also a factor in the defeat of the agreement, and it was pointed out that the coroner's jury which sat in judyment on the Fernie disaster of some weeks age had recommended that the single shift system it was explained, would have a considerable influence in preventing such catastrophes.

CAPT. CAMERON TELLS NEEDS OF Y.M.C.A. AT FRONT AND DESCRIBES MAGNIFICENT WORK BEING DONE

\$750,000 Will Be Needed This Year To Carry On Effective Labor Among Soldiers—Eloquent Y.M.C.A. Worker, Just Back From War, Narrates How Soldiers Are Being Reached By Red

Captain W. A. Cameron of the Y. denominational character of the or-M. C. A. spoke for an hour last night, before a large and deeply interested audience, in McDougall church. His subject was the work of the Y. M. C. A. in France, the aims and accomplishments of the organization, and the great need of sustaining that work financially. Without making a direct which will cortainly some."

plishments of the organization, and the great need of sustaining that work financially. Without making a direct appeal for subscriptions he declared his conviction that Canada would provide the \$750,000 asked for to enable the Y. M. C. A. to continue to do effective service in behalf of the Doys who had put the "vim" in Viny.

Dr. Tory presided and, after Rev. Dr. W. L. Armstrong had offered prayer and the audience had sung two verses of "Onward Christian soldiers," Captain Cameron was introduced and was given a most enthusiastic greeting. The speaker to ched upon some of the activities of the Y. M. C. A. among the soldiers at the front, and explained the purpose for which the expenditures were made. For example \$60,000 would be needed to provide paper and envelopes for letter writing. Yet who could not say that these facilities were not among the most important agencies for good that could be imagined? A thousand dollars a month would be spent on concerts, to offset the influences of the "wet canteens." "For the life of us, some of us can't see why there should be any wet canteens at "An", remarked Capt. Cameron, amid applause, adding that the concerts weer putting the any wet canteens at an," remarked Capt. Cameron, amid applause, add-ing that the concerts weer putting the canteens out of business at that very hour. For baseball goods alone \$25,was to be paid out, which was e than either of the big leagues

spent in a season. Cornered Baseball Market The Y. M. C. A. had literally cornered the market in buseballs and when the American ambassador wanted some recently he had to come with a properly humble request to the Y. M. C. A., who graciously allowed him a few. Twenty-five tons of maple sugar were taken over for the Canadian bears the Franch government letting. ooys, the French government letting boys, the French government letting down the import barriers for it to enter the country. The great new head-quarters building on the Strand was to cost another \$60,000. The money, declared the speaker, was being spent wisely and in some cases lavishly for the boys by whose life blood the tree of liberty was being watered. The business was being watered, he

the boys by whose life blood the tree of liberty was being watered. The business was being administered, he said, at a cost of less than one per cent, a record of efficiency only approached by the Patriotic fund.

Y. M. C. A. Power to Grow
Captain Cameron predicted that after the war the Y. M. C. A. would be found to have developed into a powerful and influential organization. He said that it was not only uplifting the lives of the soldiers but that it was strengthening the morale of the whole Canadian army. He repeated his assertion, made at the Rotary club meeting, that the vast majority of young Canadians had kept their manhood clean and unsullied and that young Canadians had kept their man-hood clean and unsulled and that character was steadily being devel-oped through the efforts of the Y. M. C. A.

Work is Undenominational Finally he laid stress upon the un-

denominational character of the organization, adding: "If the churches
do not learn from the experiences of
this institution, if they do not get over
their stiffness and starch, if they do
not get active and roll up their sleeves
and go to work as the Y. M. C. A.
is doing, they will deserve the failure
which will certainly come."

After a hearty vote of thanks had been given Capt. Cameron the singing of the national anthem closed the ev-ening.

CANADIAN TROOPS IMPRESS WORLD WITH INTELLIGENCE

"There is nothing like a great national trial to test the stuff of which institutions are made. For many years the Y.M.C.A. had pursued to course demonstrating in a thousand ways that it had a place of its own in the life of the nation's young manhood. But with all its steady progress it did not all with all its steady progress it did not all with all its steady progress it did not all ways appeal to the imagination of the public. On August 4th, 1914, a great national storm came upon us. Many institutions went crashing to the ground, others emerged stronger than before. Amongst the latter was the Y.M.C.A. It has found its soul in the activities of its work in the training camps in Canada, in England, and with the troops in France."

So spoke Captain W. A. Cameron, of Toronto, who was a visitor in the city during yesterday. Capt. Cameron is home on furlough, after having spent something over a year in the Y.M.C.A. work with the soldiers in England and France.

"The institution must be judged by its work," continued Capt. Cameron. "It has been essentially constructive. The hardships, exposure, and desolation of war has been lessened by the buts and buildings fitted up by the association. When one has witnessed its work on the field it is easy to endorse the testimony of Sir Douglas Haig, "No one can be long in France without realizing the immense value of the Y.M.C.A."

Progressive Work.

"Then too, I think I ought to say its work has been reorgessive as wall as

out realizing the immense value of the Y.M.C.A."

"Then too, I think I ought to say its work has been progressive as well as constructive. A year ago there were twelve officers in France and seventeen in England.; today there are thirty-two officers in France and fity-three in England, and within a few weeks this number will have increased to a hundred. A year ago seven centres were operated n England and thirty-three in France; today there are thirty-four in England and fifty in France, Wherever the British soldier goes the Y.M.C.A. is on his track with its practical and unselfish works of love. The institution continues to provide good things men need for their hodies as well as food for the mind and papers and books, in magazines and lectures. It reminds men of home by supplying free paper and envelopes. The best evidence of the men's appreciation of this is to be found in the fact that often as many as three thousand letters a day will go out from a single hut. It gives away tremendous quantities of hot drinks. It has a single hut. It gives away tren dous quantities of hot drinks. It spent \$25,000,000 in baseball for

COUNCIL APPOINTS COMMITTEE TO INSPECT CITY ASSESSMENTS

Aldermen Douglas, Bellamy and Martin Are Chosen For This Work. -Large Amount of Routine Business Come Up For Discussion-Shorter Hours for Blacksmiths.

Council met in special session on Thursday afternoon, the primary object being to appoint a special committee for the purpose of going through the 1917 assessment rolls, City Assessor Walker having announced that the preparation of the assessment had advanced to such a stage that this should now be done.

should now be done.

In addition, council transacted a considerable amount of routine busi-

Aldermen Douglas, Bellamy and artin were appointed as a special mmittee to go through the assess-

ments.

The matter of the Grierson appeal The matter of the Grierson appeal against assessment, which has recently been decided against the city in the Supreme Court of Canada at Ottawa, come up owing to the receipt of a letter from the city's agents at Ottawa confirming the judgment against the city, as reported in the Bulletin several days ago.

Shorter Hours For Blacksmiths.

The by-law enforcing the closing of all blacksmith's shops within the city at 5 o'clock in the afternon until 5 a.m. received its third reading, and now goes to the utilities commission for approval.

for approval.

Following the representations of a delegation from the blacksmiths, a clause was cut out which had reference to the serving of customers who were in the shop immediately before the closing hour, as it was pointed out that this point was fully covered by the

city charter.

C.N.R. Want Reducelton.

The Canadian Northern Railway Co. want to make a bargain with the city in regard to their arrears of taxes, and also want a reduction on the future assessments of their yards.

Mr. Nicholis appeared before coun-

cil, on behalf of the C.N.R., and said that this matter of taxes harked back to 1912, and some even prior to that time. Appeals against the assessment had been made annually and had been disallowed. At the present time the arrears amounted to \$22,769, and the company wanted to get down to a basis of settlement with the idea of effecting a compromise with the city. Suggesting what would be agreeable to the company, Mr. Nicholis said that they would be willing to pay \$18,600, and have \$4,169 of the arrears cancelled by the city. It was asked that the assessment of the C.N.R. yards, which were assessed for shed purposes alone, be reduced from \$627,000 to \$300,000.

\$300,000.

Eventually the matter was referred to the consideration of the special assessment committee, along with the finance committee.

H. S. Rossum asked permission to build a one or two-storey building at Jasper and Second in contravention of the byław. The request was granted, Aldermen Pheasey and Kinney dissenting.

Settlement Recommended.

The claim of the Edmonton Con-tracting Company, which is one of the heritage of claims for suspended con-tracts left over from 1914, was before council, and the commissioners recom-mended terms of settlement which were satisfactory to the interested parties, and were eventually approved were satisfactory to the interested parties, and were eventually approved by council. The original claim was for \$11,400, which, after negotiations, was reduced to \$2,000. The company now stated that they were prepared to release the city from all obligations provided that there was an immediate cash settlement of \$1,500.

Action Confirmed. Council confirmed the action of the

"Mickey," or rather Pte, J. W. R. McCormack, left Edmonton with the 66th Battalion, but was later transferred to the mounted division, and it was evident that the mounted troops had some considerable part in the chase at that time.

Included in the collection is an officer's sword string, a pair of goggles, a water bottle, a crest from a German helmet, a water cup, a combination folding spoon and fork and an improvised body beit made of a machine gun belt, which was to hold cartridges.

EDMONTON NEVER FELT QUITE SO BIG

Where is Edmonton?
It seems the Daily Mail, of London, England, is not certain on the question, They evidently know it is somewhere on this side of the Atlantic ocean, and that once way back in the early history of Canada there was a firm known as the Hudson Bay Company, who traded in "grocsries and liquors."

They sent a paper to the Hudson Bay Company in Edmonton, but not being sure whether the city was in Newfoundland, Alberta, or British Columbia, they addressed it as follows:

"Messra, Hudson's Bay Co., Grocery Stores and Liq., Edmonton, Alberta, British Columbia, Newfoundland, Canada,"

\$2800 DAMAGES ARE AWARDED **AGAINST CITY**

Judgment Is Handed Down In Case of A. E. Lawrence and His Wife.

Judgment has been handed down by Mr. Justice Scott in the suits for damages brought against the City of Edmonton by E. A. S. Lawrence and

Edmonton by E. A. S. Lawrence and his wife.

The verdict is awarded to the plaintiffs and the damages are assessed at \$2000 for Mrs. Lawrence and \$800 for A. E. Lawrence.

The plaintiff, Allan E. Lawrence, is a conductor on the street car, and Margaret Jane Lawrence is his wife. On or about the 19th day of January, between the hours of 6 and 7 o'clock at the corner of 101st and Jasper, Mrs. Lawrence was a passenger on one of the street cars. It was claimed that the defendant's servants negligently and carelessly operated the car while Mrs. Lawrence was descending and by the negligence she was severely and permanently injured, suffering severe physical, mental and nervous shock.

TEACHERS SALARY INCREASES ARE NOT TO BE CONSIDERED AGAIN UNTIL NEXT NOVEMBER

This Is Decision Reached At Special Meeting of School Board Held Last Night—Trustees Think That Public School Teachers Have Better Claim Than Those of High Schools.

That any further consideration of ncreases in teachers' salaries, or reinstatements to the 1914 basis, should be left over until November next.

This is the resolution unanimously agreed to by the public school board at their special meeting on Thursday night, and the resolution covers both the public and the high school teachers, as there were requests from both bodies that salaries should be re-in-

stated.

There was a good deal of discussion and consideration given to the reguests and the arguments that have been put up in support, but the feeling of the board is that, in justice 30 the financial position to the city, it cannot consent to any additional expenditure that might add to the demands on the citty's firsacial resources. On the other hand the board does not feel unkindly toward the teachers, and provided that conditions do not grow worse, there is an do not grow worse, there is an agreement of opinion that the subject might well be considered again in November and the advance granted.

The Stronger Claims
The major portion of the discussion that took place centred around the public school teachers' salaries, it being suggested that the high school teachers did not have such a strong claim as a savong who was in receipt teachers did not have such a strong claim, as anyone who was in receipt of a net income of \$2900 per annum was in a fairly good position these days. Some interesting comment was made on the subject of the high cost of living, which had been urged in support of the applications, Trustee Duggan pointing out that although the cost of living had advanced of late, yet in 1915 and 1916 the cost of board and rooms had decreased rather than advanced, so that even with the ten per cent off their salaries the teachers were not the losers.

Trustee Rea argued that the figures

and permanently injured, suffering severe physical, mental and nervous shock.

Mr. Lawrence claimed damages for the loss of the services of his wife at the rate of \$30 per month and costs for medical fees, also general damages for \$2,000. Margaret Jane Lawrence sued for \$5,000 damages and costs.

Says Figures Incorrect

Trustee Rea argued that the figures as given publicity to by the teachers comparing salaries paid at Edmonton with those given elsewhere were incorrect and gave awrong impression, also the statements with regard to the cost of living. He contended that salaries at Edmonton were equal to those at Calgary or as the coast cities and

that the cost of Hving was higher at these places.

Trustee Douglas said that no provision had been made for additional salaries this year, and he did not see how it would be possible to make any change. He would like to see things remain as now, and the question considered at the end of the year.

Alternative Scheme

Trustee Barnes presented an alternative scheme, which while cutting out the ten per cent discount, made for slightly reduced salaries for grade teachers coming under the first and second years of the schedule. This was not favored by the board.

Trustee Ramsay was in favor of the question being dealt with at the end of the year, and Trustee Frost was also in agreement with this. He alluded to the matter of the city's finances and said that it was all very well to say that the school board had only got to ask for the money, but if the city did not have the money, the school board could not have it.

The matter of the salaries paid to the staff employed in the board's central offices was left to the finance committee for consideration and report.

With regard to the salaries paid to the caretakers at the schools certain recommendations weer made by the buildings and grounds committee which were adopted.

The Kind You Have Always Bought.

HIS is the caution applied to the public announcement of Castoria that has been manufactured under the supervision of Chas, H. Fletcher for over 30 years—the genuine Castoria. We respectfully call the attention of fathers and mothers when purchasing Castoria to see that the wrapper bears his signature in black. When the wrapper is removed the same signature appears on both sides of the bottle in red. Parents who have used Castoria for their little ones in the past years need no warning against counterfeits and imitations, but our present duty is to call the attention of the younger generation to the great danger of introducing into their families spurious medicines.

It is to be regretted that there are people who are now engaged in the nefarious business of putting up and seiling all sorts of substitutes, or what should more properly be termed counterfeits, for medicinal preparations not only for adults, but worse yet, for children's medicines. It therefore devolves on the mother to scrutinize closely what she gives her child. Adults can do that for themselves, but the child has to rely on

The agenda of the general meeting of the Local Council of Women came up. Mrs. Bouchier was appointed delegate to the recruiting meeting today. The Lloyd George Chapter announced a sliver tea at the home of Mrs. John Kelly on Saturday, and the Me-Ne-Ho-Ko-Sis Chapter that they are selling tickets on a percentage basis for two performances at the Pantages. The Beaver House Chapter are arranging for addresses at the eity schools on Empire Day.

Of course nearly everyone who went to Pantages on Thursday night went to hoar and see Master Cecii Martin and his sister Miss Elolse in the special extra act put on under the auspices of the Me-Ne-He-Ko-Sis chapter I. O. D. E., which chapter derives a percentage from the sale of tickets for last night and tonight. Everyone was delighted and the applause these youthful artists received was prolonged and insistant. They certainly deserved it and not only were the audience delighted but the people of the Pantages bill were also and the perfectly charming manner in which these very attractive and talented children put their act "over" drew admiration from the regular performers who all thoroughly enjoyed the popularity in which the children found themselves. They are both pretty and are totally unconscious of the attention which they attract and therein lies the charm. The volces are sweet and tuneful and the costumes are becoming. But in case too much might be said to spoil the thrill of seeing and hearing, the rest will be left to the reader's enjoyment tonight. The theatre was most appropriately dethe reader's enjoyment tonight. The theatre was most appropriately decorated for the occasion with many flags of the Allies.

An appreciative though a small idience listened to the concert given y the choir and orchestra of Wesley by the choir and orchestra of Wesley Methodist church last evening. Musical and military aftairs are alike in that the general result is effected by drill, discipline and obedience to the comanding officer rather than from any individual effort however pleasing. Mr. Hendra therefore deserves the greatest credit for the ensemble of both chorus and orchestra. The the greatest credit for the ensemble of both chorus and orchestra. The erchestra did admirably and should be heard oftener. The position of the pieces on account of the unfortunate arrangement of the stage was a slight detriment and brought into prominence, wood-wind and brass, which covered the tone of the strings at times. "Caressing Butterfly" was the popular number and was encored. The choir was good, considering the fact that owing to conditions the lack of male voices affected the balance. Aside from this the intonation was well-kept and the work spirited. Another point in favor of the chorus was the responsiveness to the baton, the times was the responsiveness to the baton tent. was the responsiveness to the baton. The best number was "Good night, good night, Beloved." Miss Nora Eliss deserves special mention for the excellent accompaniments and her pianoforte solo was brilliantly played and the shading pleasingly marked. Giving Shower for Bride

To the Editor of Woman's Page:
Dear Madam—I want to give a shower to a girl who is to be married shortly and I am anxious to make it a surprise party. I want the other girls who work in the office with us to come to the party. How shall I go about asking them and what kind of a shower would you advise me to give?

The best way to invite the girls who are with you in your office would be by word of mouth—that is, do not write invitations, but tell each girl about your plans for the shower and ask her to come. You will have to be careful to speak only to one or two at a time, as the girl for whom the party is to be given will be sure to notice that something is going on about which she is ignorant, and it might hurt her feelings or give her an idea of the surprise in store.

Ask her to come in and spend the evening with you and only give her the invitation casually the day before, or even the day you plan to give the

CAPTAIN RITSON KILLED IN ACTION

Another U. of A. Graduate Gives His Life—Lleutenant Lister Dead of Wounds.

Word has been received in the city that Act.-Capt. Claude Wilson Ritson has been killed in action. Capt. Ritson, was a graduate of University of Alberta, Science 1914, and was well known throughout the city and district. He was one of the group of six varsity students who left Edmonton in January, 1916, five of whom were transferred to the Imperial army and the other to the Canadian tanks service. His parents live at Brooksiey, Alberta, near Lacombe. He was a promising young athlete, playing rugby football in 1913. After graduation he worked with a number of survey parties through the north country.

Word has been received that Lieut.
W. R. Lister, who is well known in the city, has been reported as dead of wounds. He was one of the first men to leave Edmonton when war was declared, departing from this city in August, 1914. He was a law student and court reporter. He acted as stenographer for Judge Noel. He went oversoas as a supper in the engineers and was raised to the rank of Lieut. for his work upon the field.

A Minister's Evidence

That Piles, or Hemorrhoids, Can be Quickly Cured—A Justice of the Peace Cured Many Years Ago.

Toronto, Ont., May 12.—There has come to us recently these two letters from prominent men who bear unquestionable testimony in regard to Dr. Chase's Ointment as a prompt and lasting cure for piles.

These men give their evidence freely because they know what it means to suffer from the tortures of piles and then be cured. They feel it a duty and a pleasure to let others know how they too may be cured.

Rev. Frank 'N. Bowes, Methodist Minister, Priceville, Ont., writes: "In the winter of 1912, I was stationed in Cobalt. I went for a snowshoe tramp one day, and sat for only a few minutes on a cold stump waiting for some comrades to catch up to me. From sitting on the damp stump I contracted piles, and suffered so severely that it caused me great pain to walk. A friend recommended Dr. Chase's Ointment, and I immediately purchased a small box which very rapidly effected a cure. I always keep a box on hand and find it excellent for any kind of wound or sore.

Mr. W. B. Thorne, J.P., Alderside, Alta., writes: "It was twenty-eight years ago that I became acquainted with the merits of Dr. Chase's Ointment and would not be without it on any account as it never falls to do its work. I was first induced to try it for piles. Less than one box cured me and I have never been troubled since. That was twenty-eight years ago, so I think the cure is permanent. It is good for sore lips and hands, chafing and in fact, all sorts of sores. You are not ilberty to use this statement for the benefit of others."

You can put Dr. Chase's Ointment to the test in any case of piles with the utmost assurance that you will obtain relief from suffering and ultimately lasting cure. 60 cents a box, at all dealers, or Edmanson, Bates & Ce., Limited, Toronto.

"You ask me what I think of the Canadian soldier. The question is ensuly answered. In the first place the Canadian soldier impresses everyone by the fact that he is clean. He is clean in his person, his vite, his uniform. I have seen him come out of the trenches so be-spattered that he was almost beyond recognition but in the space of half an hour or so by a vigorous application of soap and water, the mud had all disappeared and he is once more fresh and smilling. The good French folks consider that he is far too extravagant with these valuable commodities. All the same, they frankly concede that of all the soldiers he pleases the eye most.

Capt. Cameron Is Full Of Praise For Work Of Canadians

CANADA'S ARMY IS UNSULLIED, SAYS CAPT. CAMERON

o'clock, His Lordship, Mr. Justice Ives
presiding:

praise, sung to a modern race of heroes.

He also told of the work of the Y.M.C.A., how right up to the front line the officials looked after the soldiers' comforts. Expression of the gratitude of the men and what it means to them is found in the remark of a soldier who, at the close of one of their concerts, shouted out: "I move a vote of thanks to the old Y.M.C.A.," which remark was greeted with a storm of applause.

Sporting Facts and Fancies

Just as boxing enthusiasts were despondent over the failure of the New York promoters to behave themselves sufficiently to save the game in that state, comes the news that the Illinois legislature has passed the bill legalizing ten round no-decision bouts, so Freddie Welsh and other title holders may look forward to a meal ticket for a while yet. The no-decision clause, however, spells danger to the game for so long as the "champeens" can dodge through ten rounds without taking any unnecessary risks, just so long will there be trouble. Decision contests are the best things for the game in the long run.

Sergt. Louis Scaler, boxer and promoter, and now a soldier, was still quartered in England at last reports, his company being quar-antined with measles. Louis' chief craving is for sugar, and as he does not smoke, any friends who want to do him a real favor will send over a few lumps for his tea.

Harry Anderson, citizen of Edmonton in 1916, wants to box Joe Bayley of Victoria, former Canadian champion, at any time in aid of the Canadian war funds. Anderson has issued a challenge to the former champ in the following form:

"If Bayley will box me I am willing to go through with the bout in aid of the Red Cross, patriotic or any other war funds, and will not accept a cent for my end. This will give both Baylay and myself an oportunity to do our bit. Eddie Pinkham is willing to box the winner of our proposed bout with the Canadian lightweight title at stake, and if Bayley is willing we can sign articles immediately. It's up to Joe to accept if he thinks he can beat me."

Johnny Evers is the Grand Old Man of the National League. The passing of Hans Wagner leaves Evers the veteran of the old circuit in point of service. Little Johnny is now playing his sixteenth season and is 24 years old. He began with the Cubs in 1962 and played with them for twelve years before joining the Braves. Evers' rivals as veterans are Sherwood Magee, Frank Schulte and Leon Ames, who are all now playing their fourteenth season in the National League.

Jake Daubert must feel sort of proud over the fact that Col. Ebbets turned down an offer of \$25,000 for the Robins' first sacker. It isn't everybody who is worth that much to his boss.

Ed Pfeffer doesn't seem to be able to get into his stride. On quite a number of occasions within the past month or so Pfeffer's games have been saved for him by the good work of his team mates.

Hai Chase is getting more popular with the fans. He was for a long time in disfavor with them but a gradual reconciliation is taking place. That's because Hal has stopped his eternal kicking and is settling down to play the game.

Hughie Jennings has his hands full, too. The refusal of Oscar Vitt to play has knocked his plans into a cocked hat, and Hughie is sweating over his third base problem. Jones, a recruit, and Ben Dyer, a former Giant, are filling in for the present, but Hughie wants someone who is handler with the stick than either of these two have proved themselves to be.

The friends of Fred Brainard, the former Giant, will be glad to hear that he is making good with the Providence Grays. Fred recently was made captain of that team.

Here's an amusing little incident that took place in a game a few weeks ago between the Giants and Braves in Boston. The Giants were in the field, with Umpire Byron officiating on the bases and Eddie Fitzpatrick coaching at first base. Gowdy rolled one down toward first, and Holke scooped the ball up, stepped on the bag and then tossed the ball to Tesreau, who was pitching. Instantly Fitzpatrick rushed up to Byron and shouted: "He threw that ball in before he stepped on the bag." "No, he didn't," replied Byron, and turning to Holke asked: "Didn't you touch the bag before you threw the ball away, Walter?" "I certainly did." replied the latter. "Well, I'm a son-of-a-gun!" ejaculated Fitzpatrick. "So you're calling them by their first names now, eh?"

One of the longest games in the annals of baseball history was played on May 11, 1877, between a professional team from Manchester, N.H., and the Harvard college team. The game, which was played at Boston, went to twenty-four innings and the score was 0-0.

ed at Boston, went to twenty-four innings and the score was 0-0.

1839—The St. Louis Browns defeated Baltimore by a score of 20-4. Arlie Latham was the hero of the game. The Dude, as he was then called, accepted eight chances in the field, scored five runs got two singles, one double and two home runs.

1893—George Davis of the Giants, a few years ago manager of the Des Moines team, made four singles and a home run in a game with Philadelphia.

1894—Phil Nadeau of the Springfield Eastern League team got four hits for a total of thirteen bases in a game with Troy.

1904—The Boston Americans defeated Detroit, 1-0, in fifteen innings, Cy Young pitching for the Red Sox, who at the time were managed by Jimmy Collins.

1909—The Detroit Tigers defeated the Highlanders, score 16-5.

Today is the sixty-ninth anniversary of the death of Tom Cribb, the great English champion, who was the first to fight an American for the world's title. Cribb was one of the most remarkable fighters in ring history, and for that reason there is dedicated to him the finest monument ever erected to a puglist. It stands over the grave of Cribb at Woolwich, amid those of many of the naval heroes of Britain. Cribb is best known to American negro and exslave, who was the first American to seek world's championship honors. The first contest between Cribb and the negro was fought in 1810. In the beginning of the contest Molineaux, had everything his own way and by the twenty-eighth round he had almost won the fight. In fact he had decidedly won it for Cribb was unable to respond to the call of time. In defiance of the prescribed rules, Cribb was allowed more time in which to recover and Molineaux, exhausted, finally fell and hit his head against a stake and was unable to get up. It was generally recognized that Molineaux had won the victory. The following year he again fought Cribb but dissipation had wrecked his health and the negro fell an easy victim to Cribb, Molineaux was the only man who ever stood up against Cribb, who held the championship title longer than any other man in ring history, that is, from 1892 to 1822. He finally retired undefeated.

\$25,000 FOR SERVICE OF JOCKEY CRUMP

Clever Rider Will Be Seen Canada This Season,

With the number of good jockeys imited in these times wealthy owners are willing to pay almost any price for the scrvices of a first class rider. They are as a rule, however, most anxious to secure the services of boys with the most experience and when Tommy McTaggart was offered \$25,000 recently for first call on his services.

Tommy McTaggart was oftered \$25,000 recently for first call on his services no very great surprise was expressed in turf circles for McTaggart is ranked as one of the best if not the best rider on the American turf today. He has been riding for a number of years. But to ofter \$25,000 for the services of an apprentice rider is an almost unheard of event. Such a thing has taken place, however, and Jockey Willie Crump, now leading all riders in winning mounts for the year is the boy in the limelight.

Eastern parties, so it is said, have offered E. W. Moore, who holds the boy's contract, \$25,000 for it but the offer has been turned down. Moore says that the boy is not for sale and that he will bring him to Canada this summer to ride his horses on the C. R. A. tracks. Crumps will likely be seen in the saddle at Connaught park in that event and he should be an attraction in himself. The apprentice boy, who has come to the front since the first of the year, has on aumerous times out-ridden. Frankte Robinson, Butwell, and the two McTaggart boys, it is said that he shows uncanny ability in handling horses to get the It is said that he shows uncanny ability in handling horses to get the

TURN DARK HAIR WITH SAGE TEA

If Mixed With Sulphur Darkens so Naturally Nobody Can Tell.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grand-mother's recipe, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advan-

tage, Nowadays, though, we don't have the troublesome task of gathering the Nowadays, though, we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use product, improved by the addition of other ingredients, called "Wyeth's Sage and Sulphur Compound" for about 50 cents a hottle. It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur Compound, is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive. This ready-to-use preparation is a delightful toilet requisite for those who desire a more youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

What The Advance Men Say.

HARDER TO DANCE WELL
THAN TO SING WELL.
"It is harder to dance well than to sing well," says Mile. Blanca, premier danseuse, appearing at the Pantages this week in a series of artistic dances. "I don't mean that it is harder work physically, but dancing is harder to acquire, and it makes more demand upon the artist. I began dancing when I was six years old, and have been dancing and studying ever since. And the studying in books the art of the old Greeks and in perfecting the movements, but in studying in books the art of the old Greeks and Egyptians. Ancient people danced and sang accompaniment, and finally musical instruments took the place of the voice. [Titimately, music and the dance separated, the former improving and the inter deteriorating."

the former improving and the latter deteriorating."

Other good acts on the Pantages bill this week include Will Morelsey, who is "annoyed at the plano by Freddle Clinton;" Ed. F. Reynard, America's most original ventriloquist; Alberto, who plays a xylophone and dances at one and the same time; "Honeymoon Isle," a girl act that really has something out of the ordinary to offer; Dorothy Vaughan, "cheerful singer of cheerful songs," and the fourteenth calsode of "Pearl of the Army."

Next week's Pantages bill includes Ed. Illondell, the greatest impersonator of "overgrown boy" types on the American stage; and "The Magazine Girls," a girly show in which a new idea is presented.

Oulte contrary to the case often apparent, Georgie Cohan is today as unaffected and democratic as he was during the days he took lessons on the violin back in Providence, R.I. His many friendships are sincere regardless of "stations in Hig." and he is as popular with the stage carpenter as he is with the greatest of theatrical and motion picture velebrities. That he will gain boats of new friends an i is gaining them as a tesuit of his initial picture, "Broadway Jones," is being proved this week at the Monarch Theatre, where the Cohan film is being exhibted for the entire week. Horn on the fourth day of July, it is easy to under stand Cohan's great particitism. This also undoubtedly explains his love for fire-trackers, brass bands and other noise-making mediums. with a woman holding the balance in the new William Fox feature picture, starring Virginia Pearson, "Daredevil Kate," which is at the Empress Theatre today and Saturday. Kate is a woman of brains plus strength, and she has at the craft and cleverness which years of experience as a saloon proprietor have given her, and the story tells of a woman's rise from the owner of a small saloon to wife of an eastern clubman. The workmen of Devil's Gap are dissatisfied with the treatment they receive from their eastern headquarters, so they cause trouble which results in the bringing to their town of several easterners. One of their town of several easterners, the bringing to their town of several easterners. One of their town of several easterners. One of their town of several easterners, and the third is John West, Irene's husband. Stone and West, are to take over the management of the western works of the company. Kate at first takes sides with the new arrivals, for she bas fallen in love with Cliff Stone, that it is takes and the cides to help the miners unwarranted interference with their romance turns her against the intruders, and she decides to help the miners and not the managers. When the whole plan is about to expose to one owner of the mine just how easily she can control his eastern employees, she discovers that Irene is her own sister, from whom she had been separated years before. So she turns the table on the miners, holds them up to ridicule instead of the men they had been plotting against, and establishes West and Stone firmly with their company. Incidentally she agrees to marry Stone, and the two leave the wetched mining town for a newer, pleasanter life in the east. On the same program is the Mut and Jeff comedy and the Pathe Weekly Gazette.

MAJESTY.—In addition to the big feature film in which Sarah Bernhardt, the world's greatest tragedlenne, plays the leading role, the Majesty program for today and tomorrow is one which should be a big drawing card, for there will be a full nine reel program. The Binebird play, Jenne Dore, in which the Bernhardt art is perpetuated for posterity, is a five reel feature. This play needs no further comment here. The Divine Sarah, sevenity-one years oild, handlcapped by an artificial leg, is the same wonderful emotional actress that she has been for the last forty years. Every man, woman and child in Edmonton should see this film if for he other reason than that they will be able to say that they have seen the great actress in her last great stage success. Then, on today's program, there is the fifth episode of the great Universal mystery serial, "The Voice on the Vire," which numbers its followers by the hundreds in this city, as well as an L-KO. comedy and the Universal Weekly.

Dyspeptics Should Avoid Drugs And Medicines

Try a Little Magnesia Instead.

Some people instinctively shut their eyes to danger, and it may be that instinct, or custom or habit causes dyspectics to take drugs, patent foods and medicines, artificial digestents, etc.

But closing the eyes does not banish the danger, and it is certain that neither drugs nor medicines possess the power to destroy the harmful excessive acid in the stomach, which is the underlying cause of most forms of indigestion and dyspepsia. They may give temperary relief, but ever increasing quantities must be taken, and all the time the acid remains in the stomach as dangerous as ever.

Physicians know this and that is why their advice so often to sufferers from digestive and stomach trouble is "Just greative and stomach and the properties are the properties are the properties are the properties and the properties are the propertie

their advice so often to sufferers from di-gestive and stomach trouble is "Just get about an onnce of pure bisurated mag-nesia from your druggist and take a tea-spoonful in a litle water immediately after every meal. This will instantly neutralize all the harmful acid in the stomach and stop ail food fermentation, thus enabling you to enjoy hearty meals without ex-periencing the least pain or unpleasantness afterward.

DRINK HOT WATER BEFORE BREAKFAST

Says you really feel clean, sweet and fresh inside, and are seldom ill.

If you are accustomed to wake up with a coated tongue, foul breath or a duil, dixxy headache; or, ff your meals sour and turn into gas and acids, you have a real surprise awaiting you.

To-morrow morning, immediately upon arising, drink a glass of hot water with a teaspoonful of limestone phosphate in it. This is intended to first neutralize and then wash out of your stomach, liver, kidneys and thirty feet of intestines all the duitgestible waste, poisons, sour bile and toxins, thus cleansing, sweetening and purifying the entire alimentary canal.

Those subject to sick headaches, backache, bilious attacks, constipation or any form of atomach trouble, are urged to get a quarter pound of limestone phosphate from the drug store and begin enjoying this morning inside-bath. It is said that men and women who try this become enthusiastic and keep it up daily. It is a splendid health measure for it is more important to keep clean and pure on the inside than on the outside, because the skin pores do not absorb impurities into the blood, causing disease, white the bowel pores do.

The principle of bathing inside is not new, as millions of people practice it. Just as hot water and soap cleanse, purify and freshen the skin, so hot phosphate act on the stomach, liver, kidneys and bowels. Limestone phosphate is au inexpensive white powder and almost tasteless.

FRIDAY, MAY 11, 1917.

The man with the hoe is one of the "strategic reserves" of civilisation. It is time for him to take the field.

The British Government, it will be observed, is not at all afraid of wrecking the Empire" by taking twice what it did a year ago.
There is not much in that economic all the "Yankee dollars" it can get hold of, whether in return for products or promissory notes.

Our Government, it seems, has got to the stage where it has to get Washington to do its thinking for it, even on so self-evident a proposition as the necessity of regulating food prices. It is apparent that in looking to Ottawa for leadership in the national war effort the public have been looking in a hopeless direction. The Ministers need leadership more than the public.

The Times announces that the British Government has adopted the principle that the state should buy up the liquor trade in Ireland. If so, there may be looked for a popular demand that the liquor trade in England and Scotland be also bought up—and then shut up. That England and Scotland will supply the money to free Iremand similar relief for themselves is not among the proba-

The record of submarine depredations for the week shows a decided decrease in the number of ships destroyed. This may only a variation incidental to the piratical operations. The most ardent and resourceful pirates cannot be supposed to escape an occasional run of "poor luck." But from some glimmerings of information the censor has allowed to show themselves in the past fortnight there seems to have been some sort of reorganization effected at the British Admiralty, specially aimed at making the submarine menace less menacing. The better report this week may indicate the beginning of the results.

The inventive genius of the American people is one of the new resources which the brutality of the enemy has added to the strength of the Allied cause. And it is a resource upon which, and rightly very great dependence will be placed. At present the in-ventors of the Republic are being mobilized for operations against the submarine. With the experience of the past three years to work on, it will be strange if they in co-operation with the experts of the other Allied nations-do not find a means either of destroying submarines fast enough to remove the "menace," or of carrying on the commerce of the world in de-fiance of them. There must be a way to circumvent this device, as a way has been found to combat successfully every earlier engine of war; and given time it will be

One hopeful consideration is that if the present price of wheat does not inspire the farmer to grow more of it nothing that is likely to happen could do it.

A Washington dispatch says Sir George Foster, our acting Premier, assured the authorities there that the Canadian Government would take joint action with the United States Government to control food prices if the U.S. Government thinks such control is necessary. It is to the U.S. Government the Canadian farmer is indebted for free wheat. To the same source, it seems, the Canadian consumer must look for rescue from the

The Venizelists at Saloniki have declared for the deposition of King Constantine and the end of the dynasty. That puts an impassable chasm between them and the Royalist faction. It is to be hoped the Allies are actively behind this latest development and prepared to see it through; not merely associated with it in hope of obtaining advantage without assuming responsibility. Watchful waiting has been a more lamentable farce at Saloniki than

in Mexico. To continue it until he war ends and then leave the Venizelists to the vengeance of their enemies would be adding crime to folly

Increased production is urged s the only and certain remedy for the high cost of living. That it is a necessity there is no question, and therefore a duty. But that it will bring down the cost of living into any reasonable relation to the income of the average wage-earner is not by any means clear. There are one hundred and twenty million bushels of last year's wheat still in the country; and flour costs paradox to convince the householder that he will get the benefit of increased production to any thing like the extent to which he needs relief and is entitled to it, unless along with increased production there is some regulative factor introduced into the situation which is now wanting.

It would be worth a new divi-sion on the fighting line if our Minister of Militia could cable today to the weary men who are "sticking it out" around Fresnoy that in Canada men were swarming to the recruiting offices to make up new battalions and to fill the places of the brave chaps who have gone down. That sort of news from home would cheer the boys as no other message could. All the Huns who could get in front of them could not break their grip while the thought tingled in their minds that the manhood of Canada was falling in and moving up in support. And it is impossible to believe that the land from the curse and not de- Minister would not be able to send such message at this crucial time if the right way of appealing to be voung men of the country had en found and used with the terrible earnestness the situation has always demanded.

WHEAT GOING EAST.

Minneapolis, May 10—The first consignment of the 700,000 bushels of wheat purchased here last fall by agents of the allied governments was shipped to Duluth yesterday for movement east on the Great Laeks. More than 700 cars will be used to move the grain , which has been in storage here since its purchase.

THE VIGIL

When the great blonde beast sprawled

over Roye Grandpere stayed by the home he knew, The roof that had sheltered him when

a boy In the land where the apple-blossor

There, engulfed by the wide grey sea,
A latter-day hermit, he hid his face,
For the soul that was nurtured in
liberty
Drew back from the sight of a tyrant race.

Weary and long the months dragged

But he kept his faith in the coming and the God of his fathers heard his As he knelt in the home of his youth

to pray.
The grey flood stirred with the turning tide,
Ebbing in sullen waves countryside,
Leaving a ravished countryside,
Defiled with the mark of the great
blonde beast.

High on the roof he watches alone
For the red and the blue so long
concealed,
But who are these in a garb unknown,

The hue of morning mist on the field? Sudden the long line breaks in fire; Cheering, the far-flung ranks ad-vance, And grandpure is granted his heart's

desire.
Weeping, he welcomes the sons of France!

AMERICANS HELD PRISONERS

WASHINGTON, May 10.—That 127
Americans still are held prisoner in Germany, probably removed from captured armed merchanimen, was revealed today at the state department. It is assumed that the men were brought to Germany by raiders operating in the South Atlantic.

Lac La Biche is pleased to welcome the Rev. E. W. Villette, who will reside here in future. The Reman Catholic community has a well-organized parish, while other denominations have had, so far, no resident minister. The Rev. Villette will hold regular services now and will try to organize a parish, and later on build a Methodist church. There are more than twenty families of this denomination in or quite close to Lac La Biche. Mr. Villette may feel assured of the cordial support of everyons.

The local Red Cross Society organized a quilting bee some time ago, and the result of their patriotic work, a beautiful pink silk and Brussels lace bed cover, was raffied during the week at 10c a chance. The sum of \$26 was realized for the Red Cross fund, and the lucky wisner was Woo-Bun, the leading Celestial of Lacab Biche. Woo-Bun, also his cousin, Mr. Wong-Sing, who conducts a prominent laundry on strictly scientific lines, are highly esteemed and well liked here. Mr. Woo-Bun is an artist of no mean degree on the one-string Chinese violin, and it would be no exaggeration to call him the Chinese Kukelik. In the evening hours, when his work is done and the mellow lights of the sinking sun foreshadow a peaceful night, often can be heard, from one end to the other of our Main street, the plaintive sostenuto notes of his instrument, upon which he executes in a masterly way. Mr. Woo-Bun, as we understand from reliable sources, is a descendant of an eminent mandarin of the old school, who abhorred the new Ideas permeating China, democracy and republicanism. He held faithfully with the "Brother of the Sun," the Ming dynasty, and with his pigtail, and consequently, in the revolution some years ago, lost the yellow packet, peacock feather, red

button, pigtall, and his own head at the same time. As the ancestor was an astute statesman, so is his descendant an exquisite cook in Johnny Mackriss' popular hoter here. Whoever has partaken there of the poisson bianche a la maitre d'hotel, or ever put a spoon in his creme de tomate ordinare, a la North West Canada, will testify to the culinary genius of Mr. Woo-Bun.

Mr. Woo-Bun wishes us to state, for the benefit of the public, that he is a member of the new Chinese Republi-can party and a member of the Chin-ese National party, also a first-class private of the Canadian Home Defence Corps, Chinese Battalion.

WASHINGTON, May 10 .- Liberia's washington, May 10.—Liberias decision to sever relations with Germany was officially reported today by American minister to that country. Considerable importance is attached to this step as Liberia is the landing point of many cables and was used for some time by German residents as a base against the Britsh.

look as if there might be short interest ther also. Openings of American wheat there also. Openings of American wheat markets were extremely erratic.

Minneapolis wheat opened to down for May at 301, July was 4½c to 8½c up. at 280 to 276, and September was unchanged to ½c down at 204.

Chicago opened Ic down for May at 310, July ½c to ¾c up at 240½ to 240 and September unchanged to ½c up.

A slight frost reported at Caigary, Lethbridge and Winnipeg.

There were 811 cars of all grains inspected, with 234 cars contract wheat.

Reported \$25 cars in sight for inspection. The closing was a very tame affair in Winnipeg. The American markets were more sensational and showed very wide spreads in May, especially in Minneapolis. Duluth flax had a strenuous morning, the fluctuations being 18c for May, 19c for July and 15½c for September.

There was nothing in the news to give a reason for this except more builtain news from Argentine and an increased export demand. Winnipeg wheat closed ic higher for October.

Oats closed ½c lower for May, ¾c lower.

September.

There can hardly be said to be a cash situation, as practically everything except N.W. flax is going into the clearing house to help clean up. The new arrangements seem to be working well and while no figures are given the statement was made that more of the short interests had been satisfied than had been expected in the time. satisfied than had been expected in time.

The strength of October wheat in Winnipeg is the cause of much discussion. A fair amount of the sales are by farmers, but there is a poor percentage of speculative trade, though the volume of business is not as large as yet. The trend of discussion is strongly in favor of the maximum and minimum, which, of course, can only be fixed by the Government.

EDMONTON STOCKYARDS.

Stockyards, May 10 (noon).—Today's receipts were the largest for some days, and yet they were all sold, for the demand is strong for all classes of live stock. All prices are steady and remain at the record top-notch in most of the classes. Today's receipts were 12 cattle, 22 calvas, and 322 hogs. Among the receipts were two cars from Onoway U.F.A. and two cars from Onoway U.F.A. and two cars from Leduc U.F.A., two cars from Alliance and a car from Stony Plain. Every hoof was sold and the demand is keen for more stock as fast as it comes. These shippers who sell on the off car basis are often gone with their money in a haif hour after their arrival. Those who sell on a fed and watered basis are delayed for a short time while their annians mane money out of their meal of hay, grain and water. Today's quotations are as follows:

Heef—Fed and Watered Basis
Steers, choice to prime. \$ 9.75 to \$10.00
Steers, good beef. \$ 0.00 to \$.50
Heifers, select beef. \$ 0.00 to \$.50
Heifers, select beef. \$ 0.00 to \$.50
Oxen, good \$ 0.50 to 7.75
Oxen, common \$ 0.00 to \$.50
Oxen, common \$ 0.00 to \$.5

CHICAGO GRAIN.
Chicago, May 10.—Sharp breaks in the price of wheat took place today, owing to the circulation of vague rumors of impending peace developments. An efficial Kansas report showed unproved crop conditions in the eastern and south portions of the State tended also to weaken the market. Trading was on an extremely restricted scale, as commission houses were demanding that speculators put up almost prohibitive margins, 50 cents a bushel or more. Opening quotations, which ranged from 1c decline to %4 advance, with May at 310, July at 246 to 248%, wer followed by a general fall, as much as %2 in some cases, and then something of a reaction.

CROP OUTLOOK IN GREAT BRITAIN IS DISCOURAGING

Most Unfavorable Weather Conditions Within Memory Prevail This Spring

London, May 10.—Reports of the agricultural outlook in Great Britain are almost uniformly discouraging. Not even the oldest farmer recalls a Not even the oldest farmer recalls a more trying time than that through which he has just been passing. A late sowing, a poor yield, a wet autumn and a severe winter have been followed by a spring with all the characteristics of December. The state of the fields is called in all the agricultural reports "serious," although it is still possible that a series of warm weather might change the situation considerably by the end of May. The history of many of the best of the British crops this year is a story of sowing in November and re-sowing in April. April.

April.

The wheat area, it is stated, cannot be large this year. Outs cannot yet be estimated and barley for some reason is in distayor although on good barley lands there is yet a sound crop to grow.
In the middle of April potato farm-

In the middle of April potato farmers were still awaiting a favorable moment to push ahead their planting. Everything is late. The farmers' calendar is out of gear, for the farmer must wait upon the weather. Moreover, there is considerable scarcity of seed on the wide destruction of autumn sown crops and there are appeals for economy in seed stocks.

Owing to the shortage of cattle foodstuffs there will be a large reduction in numbers of livestock on the farms during the next three months.

Out on the river swift work was going on. Steam from every available boiler was carried across the ice in feed-pipes, the night shift had been roused from sleep, and every available man was busied in relieving the pressure. Pile-drivers hammered long timbers into the river-bed above the threatened point, hydraulic jacks were put in piace, and steel cables were run to drum and pulley. The men worked sometimes knee-deep in ice-water; but they did not walk, they ran. The men worked sometimes knee-deep in ice-water; but they did not walk, they ran. In an incredibly short time the preparations were completed, a strain was put upon the tackle, and when night came the massive false work had been pulled back into line and the traveler was once more swinging steel into place. It was a magnificent feat, yet not one of those concerned in it could feel confident that the work had not been done in vain; for the time was growing terripay snort, and, athough the loc

After the southern half of the span had been completed the warmth increased rapidly, therefore the steel crew lengthened its hours. The men worked from seven o'clock in the morning until eleven o'clock at night.

On the 13th, without warning of any sort, Garfield Glacier began moving forward. It had lain lnactive even during the midwinter thaw which had started its smaller brother, but that warm spell had evidently had its effect upon the glant, for now he shook off his lethargy and awoke. He stirred, gradually at first and without sound, as if bent upon surprising the interlopers; then his speed increased. As the gradual of the control of the first day was only two inches, but that was sufficiently serious.

The onset of Carfield at this time was, of course, unexpected; for no forward motion had even been reported prior to the spring break-up. The action of the ice heretofore had been alarming; but now consternation spread, a panic swept the ranks of the builders for this was no short-lived phenomenon, this was no short-lived phenomenon, this was the annual march of the glacier lisself which promised to continue indefinitely. A tremendous cutting-edge, nine feet in thickness, like the biade of a carpenter's plane, was being driven against the bridge by an irresistible force.

Once again the endiess thawing and chopping and gouging of ice began but the more rapidly the encroaching edge was cut away the more swiftly did to bear down. The huge mass began to rumble, it "calved," it split, it detonated, and, having finally loosened lisself from its bed, it acquired increased momentum. As the men with chisels and steampoints became exhausted others took their places, but

On that day victory had been in sight, the driving of the last bolt had been that a question of hours, a race with the sliding ice. But with the holsting apparatus out of use work indied. Swiftly, desperately, without loss of a moment's time, repairs began. No regrets were voiced, no oftort was made to place the blame, for that would have caused delay, and every minute counted. Eleven hours later the broken beams were replaced, and eregtion had recommenced.

their goal.

At midnight of the 16th the last river was driven; but the lee had gained to such an extent that the lower chord was buckled downstream about eight inches, and the distance was growing steadily. Quickly the traveler was shifted to the false-work beyond the pier, and the men under Mellen's direction fell to splitting out the blocking.

As the supports were chopped away the mass began to crush the last few wedges; there was a great snapping and rending of wood; and some one, strained to the breaking-point,

"Look out! There she goes!"
A cry of terror arose, the men fled, ttrampling one another in their panic. But Mellen charged them like a wild man, firing curses and orders at them until they rallied. The remaining supports were removed: the fifteen hundred tons of metal settled into place and rested securely on its foundations.

O'Neil was the last man ashere. A O'Nell was the last man ashore. As he walked the completed span from Pier Three the barricade of piling beneath him was bending and tearing; but he issued no orders to remove it, for the river was doing that. In the general haste pile-drivers, hoists, boilers, and various odds and ends of machinery and material had been left where they stood. They were being inundated now; many of them were all but submerged. There was no possibility of saving them at present, for the men were half dead from exhaustion.

As he jurched up the muddy, uneven street to his quarters Murray felt his fatigue dike a heavy burden, for he had been sixty hours without sleep. He saw Slater and Appleton and the He saw Slater and Appleton and the rest of his "boys"; he saw Netalic and Eliza, but he was too tired to speak to them, or to grasp what they said. He heard the workmen cheering Mellen and Parker and himself. He fell upon his bed, clothed as he was; an hour later the false-work beneath Span Three collapsed.

Although the bridge was not yet finished, the most critical point of its construction had been passed, for the fourth and final portion would be built over shallow water, and no great difficulties were to be expected even though with ice went out before the work was finished. But Murray had made his promise and his boast to complete the structure within a stated time, and he was determined to live up to the very letter of his agreement with the Trust. As to the result of the break-up, he had no fear whatever.

For once Nature aided him; she seemed to smile as if in approval of his steadfastness. The movement of the channel ice became irregular, spasmodic, but it remained firm until the last span had been put in place.

the channel fee became irregular, spasmodle, but it remained firm until the last span had been put in place. Of this dramatic struggle Eliza Appleton had watched every phase with intensest interest; but when at last she knew that the battle was won she experienced a peculiar revulsion of feeling. So long as O'Neil had been working against odds, with the prospect of rain and failure forever imminent, she had felt an almost painful sympathy, but now that he had conquered she felt tinid about congratulating him. He was no longer to be pitted and helped; he had attained his goal and the fame he longed for. His success would inevitably take him out of her life. She was very sorry that he needed her no longer. She did not watch the last bridgemember swung, but went to her room, and tried to face the future. Spring was here, her book was finished, there was the need to take up her life again.

"I missed you, Eliza," he said. "The others are all down at the river-bank. I want you to congratulate me."

She saw, with a jealous twinge, that exultation over his victory had overcome his weariness, that his face was alight with a fire she had never before seen. He seemed young, vigorous, and masterful once more.

"Of course," he went on, "the credit belongs to Parkor, who worked the bridge out in each detail—he's marvellous—and to Mellen, who actually built it, but I helped a little. Praise to me means praise to them."

"It is all over now, isn't it?"

"Practically. Blaine has cabled to New York that we've won. Strictly spreading, we haven't as yet, for there is still the break-up to face; but the bridge will come through It without a scratch. The lee may go out any minute now, and after that I can rest." He smiled at her gladly. "It will feel good to get rid of all this responsibility, won't it? I think you've suffered under it as much as I have."

A little avistfully she answered: "You're going to realize that dream you told me about the day of the storm at Kyak. You have conquered this great country—just as you dreamed."

She longed desperately to tell him how willingly she would stay if he only asked her, but the very thought shocked her into a deeper reserve.

"I'm going East to sell my book," she said, stiffly. "You've given me the climax of the story in this race with the seasons."

GRANVILLE, BRITAIN'S FAMOUS

In the stirring times of the early ineteenth century, when Europe was ritnessing a similar struggle to the one aking place at the present time, there taking place at the present time, there was born in England George Leveson Gower, second Earl Granville, who became one of the greatest statesmen England ever produced. This Earl Granville was bord in London, May 11, 1815. He was educated at Eaton and Oxford and began his political career as a member of the House of Commons at the age of twenty-one. After ten years activity in the lower house, he succeeded to the honors and estates of his father, and took his seat in the House of Lords. In 1840 he was made an under secretary, and in 1841 he entered the government as minister for foreign affairs in the administration of Lord John Russell. Thereafter he was a member of every Liberal cabinet until his death. On the downfall of the Derby administration in 1859, Earl Granville attempted to form a new government, but failed. During the period of the civil war in America, Earl Granville was a firm and powerful friend of the Union cause. While other prominent British statesmen sympathized with the Confederacy, Earl Granville, like Queen Victoria, and the vast majority of her subjects, hoped and worked for the preservation of the union.

During his long career Earl Granville was foreign secretary and was born in England George Leveson

ville was foreign secretary four times, and was twice colonial secretary and once Lord President of the Council. He represented Great Britain as a special ambassador to the coronation of Alexander V. of Russia. As foreign secretary under Gladstone he handled many lamportant matters relating to many important matters relating to the Berlin treaty, the Egyptian revolt and the occupation of Tunis. He retired with Gladstone in 1885, but returned once more to office as colonial secre-

MINNESOTA ADMITTED TO THE UNION.

UNION.

Fifty-nine years ago today Minnesota became a state in the United States and added another star to the flag that is today the world's symbol of liberty. When Minnesota was admitted its inhabitants numbered approximately 150,000. Today she is one of the greatest states in the Union, with a population of over 2,009,000. The act admitting the state to the Union was passed and approved May 11, 1858. Trials and visissitudes had trailed this momentous event in an unbroken string until that time.

The first legislature of the state convened December 2, 1857, and continued until March 25, 1858, when it took a recess to await the admission of the new state. There was a great scarcity of the aimighty dollar at the time, and when an effort was made to negotiate a \$250,000 loan, the money barons refused to listen, because, they said, all acts of the self-constituted legislature were illegal and the embryo state's credit was worthless. Whereupon negotiable notes in the form of bank notes were issued and became more or less current. For a lime they were discounted, but when the act admitting the state to the Union was passed, they became worth par and eventually were redeemed.

It is curious to reflect upon all of

par and eventually were redeemed.

It is curious to reflect upon all of these obstacles that were in the way of the progress of Minnesota, for today there is in the hands of the treasurer of that state a permanent fund of more than \$26,000,000, and it is ex of more than \$25,000,000, and it is ex-bected that within the next forty or fifty years this sum will be in creased to \$250,000,000 or \$300,000,000. The only form of celebration that takes place in Minesota to commemorate her entrance into the Union is the gathering of the Territorial Ploneers.

Uncle Wiggily and the Chocolate Mouse.

Uncle Wiggily Longears, the nice rabbit gentieman, was just finishing breakfast in the hollow stump bungalow one morning when there came a little tapping sound on his door.

"Ill see who it is," said Nurse Jane Fuzzy Wuzzy, the muskrat lady house-keeper, and she let in Mrs. Longtail, the mother of Jollie and Jillie, the boy and girl mice.

"Oh, Uncle Wiggily!" cried Mrs. Longtail, 'Th in such trouble! I wonder if you could not help me,"

"Of course I can!" cried Uncle Wiggily in his most jolly votce as he drank the last of his yellow carrot coffee. "What is it now?"

"Well, you know Squeaky-Eeky, the little cousin mouse, who lives with us, don't you?" asked Mrs. Longtail.

"Oh, yes, I know her very well," said the bunny uncle. "What is the matter with her?"

"Well, of late she has taken to cating chocolate," said Mrs. Longtail. "I can't keep a bit of chocolate, either cake or candy, in the house but what Squeaky-Eeky finds it and nibbles at it. And sometimes she cats it when I don't want her to. It isn't good for her nor good for the chocolate, especially when I am saving some for a cake or pie."

"And what do you want me to do?" asked Uncle Wiggily.

"Se if you can't cure the little cousin mouse from eating so much chocolate," answered Mrs. Longtail. "Could you teach her a lesson, do you think?"

"Til try," said Uncle Wiggily. "Til stop at your house some time today when I'm out for a walk looking for an adventure, and see what I can do."

"Thank you," said Mrs. Longtail, and then she hurried back to her home while Uncle Wiggily began to think of how he could cure Squeaky-Eeky of eating so much chocolate.

All of a sudden the bunny uncle rabbit cried:

"Ha! I think I have it! That's what I'll do," and then, taking his red, white and blue striped rheumatism crutch, which Nurse Jane had gnawed for him

Today's Anniversaries

One of the earliest historic events, so far as humans have kept records of them, occurred on May 11. This event takes us back to Biblical times, for it was on this date in the year 1491 B.C., that the Egyptians under Pharon were drowned in the Red Sea. The next historical event of this day of which there is any record takes place almost two thousand years later, and is the burning in public of James de Molal, grand master, and fifty-four knights of the Temple in Paris. They were condemned on confessions of Islamism and Paganism, extorted on the rack, and afterwards retracted. 1776—William Pitt, illustrious English statesman, died.

1813—Spencer Porceval, prime minister of Great Britain, shot in lobby of House of Commons.

Sidelights on the War

THE NEWSPAPERS OF GERMANY.

The newspapers of Germany have been almost entirely under the heel of the censor ever since the war began, and as the censorahip has been in the hands of the German general staff, which practically rules the country, journalism has been in a very bad way in that country. The one exception has been the Socialist paper "Vorwaerts," edited by the brilliant Maximilian Harden, and it has suffered for its plain speaking by frequent suppression. The leader of the fire-eating papers in the empire is perhaps the Frankfurier Zeitung, which is in many respects the greatest of German newspapers. Curlously enough the guiding spirit of the paper is a woman, Frau Simon-Sonnemann, who inherit-THE NEWSPAPERS OF GERMANY guiding spirit of the paper is a woman, Frau Simon-Sonnemann, who inherit-ed the property from her father and has carried out his ideas since his death.
